ABSTRACT

The data presented in this publication were obtained in the fourth annual Higher Education General Information Survey (HEGIS IV), which included a questionnaire on financial statistics for the year 1968-69. Revenues and expenditures were listed under the following categories: (1) educational and general revenues (expenditures); (2) student aid grants; (3) major public service programs; and (4) auxiliary enterprises. The summary tables present data on current fund revenues (expenditures) of institutions of higher education by control, region, and state for fiscal years 1967-68 and 1968-69; and on enrollment, current funds expenditures, and expenditures per student by control and level of institution: aggregate United States, for fiscal years 1967-68 and 1968-69. The basic tables present data on current fund revenues (expenditures) by control, level of institution, and source (function), aggregate United States for fiscal year 1968-69; and on current funds revenues (expenditures) of higher education institutions by level of institution, control, region, state or other area and source (function): aggregate United States for fiscal year 1968-69. The methodology of the study, the institutions surveyed, the number of responding institutions, a list of nonrespondents, and the questionnaire are included in the appendices. (AF)

HIGHLIGHTS

Current funds revenues and expenditures of institutions of higher education continued to increase in 1968-69. Revenues totaled nearly $19.0 billion and expenditures rose to $18.6 billion, an increase of 12 percent for each from the preceding year.

Publicly controlled institutions reported 14-percent increases for both current funds revenues and expenditures. Privately controlled institutions had a 10-percent increase in revenues and a 9-percent increase in expenditures.

Publicly controlled institutions received and expended 62 percent of all current funds.

Student tuition and fees rose 13 percent to $3.8 billion, and continued to be 20 percent of all current funds revenues.

Current funds expenditures for instruction and departmental research increased 16 percent to $6.0 billion.

Expenditures per student rose $75 over the 1967-68 average to $2,454 in 1968-69. This was due to the 12-percent increase in current funds expenditures and the correspondingly smaller 9-percent increase in enrollments.

Expenditures per student for privately controlled institutions were $3,361; the average for publicly controlled institutions was $2,105.

FOREWORD

The data presented in this publication were obtained in the fourth annual Higher Education General Information Survey (HEGIS IV) which included a questionnaire on Financial Statistics of Institutions of Higher Education (OE Form 2300-4). The finance questionnaire, which acquired data for the 1968-69 fiscal year, was briefer than previous surveys of financial statistics, including only current funds revenues and current funds expenditures. The data acquired are included in this single publication.

The totals given here represent data for all institutions of higher education, even though not all institutions responded to the survey. (See Appendix D, List of Nonrespondents.) For those institutions not responding, data were imputed for national and State totals. (See Appendix A, Methodology.)

This publication was preceded by an "advance flyer" in June of 1970 that gave national estimates for four selected items of financial statistics derived from preliminary totals from unedited questionnaires. These edited data do not vary significantly from those early estimates.

We extend our sincere appreciation to the more than 2,000 business officers and other officials of those institutions who assisted us in the development of the survey and completed the questionnaire.

SUMMARY

Current Funds Revenues (tables 1 and 3)

Current funds revenues of institutions of higher education totaled nearly $19.0 billion in 1968-69, a 12-percent increase over the $16.9 billion total in 1967-68.

Publicly controlled institutions received $11.9 billion, or 62 percent of all current funds in 1968-69. Privately controlled institutions received $7.1 billion. However, publicly controlled institutions enrolled 72 percent of all students at institutions of higher education.

Revenues for publicly controlled institutions increased 14 percent in 1968-69, while revenues for privately controlled institutions increased 10 percent. Enrollments increased 13 percent for public institutions and decreased 1 percent for private institutions. Furthermore, the number of publicly controlled institutions increased 7 percent, to 1,042, in 1968-69, whereas the number of privately controlled institutions increased 1 percent, to 1,488.

Current funds revenues are divided into four categories: (1) educational and general; (2) student aid grants; (3) major public service programs; and (4) auxiliary enterprises.

Educational and general revenues increased 12 percent, from $12.9 billion[1/] to $14.4 billion, and represented 76 percent of all current funds revenues for both 1967-68 and 1968-69.

The following items constituted educational and general sources of revenues:

1. Student tuition and fees. These totaled $3.8 billion, 27 percent of educational and general revenues and an increase of 13 percent from the 1967-68 total of $3.4 billion.

1/ Educational and general revenues for 1967-68 were adjusted to be comparable to those for 1968-69 by subtracting income for Federally Funded Research and Development Centers ($765 million) and public service hospitals ($290 million) from the reported educational and general revenues of $13.9 billion.

2. Governmental appropriations. These increased 15 percent to $5.7 billion, 40 percent of educational and general revenues. Of this total, $4.7 billion, or 82 percent, came from State governments. (These appropriation figures did not include governmental funds received for sponsored research or other sponsored programs.)

3. Endowment income. This increased 14 percent, from $364 million to $413 million.

4. Private gifts. These went up from $553 million to $606 million, a 10-percent rise.

5. Current funds received for sponsored research (excluding Federally Funded Research and Development Centers and amounts received for recovery of indirect costs) were $1.8 billion in 1968-69. This amount was 12 percent of the educational and general total. Primary source of these funds was the Federal Government, which provided $1.4 billion, or 82 percent of the total.

6. Other separately budgeted research. This increased 5 percent to $118 million from $113 million.

7. Other sponsored programs (excluding amounts received for indirect costs) were $799 million. As with sponsored research, the Federal Government was the prime source of funds, non-governmental sources were second, and State governments were third. The amounts were $617 million, $100 million, and $61 million, respectively.

8. Recovery of indirect costs. Reported as a separate item for the first time in 1968-69, this item included amounts received as allowances or reimbursements for indirect costs. It amounted to nearly $303 million--$257 million for sponsored research and $45 million for other sponsored programs. Previously, amounts for indirect costs had been included in those two categories without separate identification.

9. Sales and services of educational departments. The $129 million figure was a 9-percent increase over the previous year's $119 million figure.

10. Organized activities related to educational departments. This item increased 5 percent to $421 million from $402 million.

11. Other sources, formerly called "other educational and general." These decreased 4 percent from $301 million to $289 million.

Revenues for student aid grants increased 15 percent, from $504 million in 1967-68 to $579 million in 1968-69 and in the latter year represented 3 percent of all current funds revenues. Chief contributor was the Federal Government with $303 million, or 52 percent of all student aid grants. Private gifts and grants, totaling $114 million, were the second source. State governments were third, with $75 million.

Revenues for major public service programs, a new grouping of categories that formerly were part of the educational and general group, included revenues of projects undertaken primarily as community or public services and were not essential to meet the educational objectives of the institution. Funds received for these programs totaled nearly $1.3 billion, or 7 percent of all current funds revenues. These programs included:

1. Federally Funded Research and Development Centers administered directly by individual colleges and universities. Funds for these centers decreased by 7 percent, from $765 million in 1967-68 to $709 million in 1968-69. These revenues represented 55 percent of the total for major public service programs.

2. Hospitals. Revenues, including State appropriations, were $497 million in 1968-69.

3. Other public service programs. Revenues were $77 million in 1968-69.

Auxiliary enterprises increased 8 percent from $2.5 billion to $2.7 billion, and constituted 14 percent of current funds revenues in 1968-69. These enterprises and the amounts were as follows:

1. Housing revenues, $742 million.

2. Food services revenues, $926 million.

3. Other auxiliary enterprises, such as college unions and intercollegiate athletics, $1.0 billion.

Current funds revenues for institutions in the aggregate United States were those funds within all 50 States, the District of Columbia, and outlying areas. The 50 States were grouped into eight regions; the three reporting the largest revenues were the Mideast, Great Lakes, and Southeast. The five States within which institutions had the greatest amounts of revenues in 1968-69 were California ($2.4 billion), New York ($2.0 billion), Illinois ($1.1 billion), Pennsylvania ($1.0 billion), and Massachusetts ($930 million). These five States represented 39 percent of the total revenues and nearly 38 percent of the total enrollment for the aggregate United States. All 50 States showed increases. Delaware had the biggest rate of increase (32 percent), and South Dakota had the smallest (4 percent). (See table A.)

A breakdown by level of institution showed that universities, with 37 percent of the enrollment, received $11.0 billion, or 58 percent of current funds revenues. Other 4-year institutions, with 39 percent of the enrollment, received $6.3 billion, or 33 percent of current funds revenues; and 2-year institutions, with 24 percent of the enrollment, received $1.7 billion, or 9 percent. Of the money received by universities, $7.4 billion, or 67 percent, went to publicly controlled institutions, which enrolled 75 percent of university students.

Public 2-year institutions, with 92 percent of 2-year institutions' enrollment, received $1.5 billion of the $1.7 billion total in that category. However, privately controlled institutions received $3.3 billion, or 52 percent of the $6.3 billion total for other 4-year institutions.

Current Funds Expenditures (tables 2 and 4)

Current funds expenditures by institutions of higher education reached nearly $18.6 billion in 1968-69, an increase over the $16.6 billion total for 1967-68 of 12 percent and only slightly less than current funds revenues for each of the two years.

In a comparison of publicly and privately controlled institutions, $11.5 billion, or 62 percent, was expended that year by the public institutions. In the previous year, publicly controlled institutions accounted for 61 percent of all current funds expenditures and, a year earlier, for 58 percent. The increasing share of total expenditures by the publicly controlled institutions was the result of the publicly controlled institutions having a higher rate of increase in expenditures than privately controlled institutions. This higher rate of increase in expenditures was, in turn, a reflection of the greater increase in enrollments in publicly controlled institutions. The expenditures by publicly controlled institutions in

1968-69 increased 14 percent over the $10.1 billion figure of 1967-68, while those of privately controlled institutions increased only 9 percent, from $6.5 billion to $7.1 billion. (See table C.)

Current funds expenditures were classified into the same four groups of functions as were revenues: (1) educational and general, (2) student aid grants, (3) major public service programs, and (4) auxiliary enterprises.

Educational and general. These expenditures were $13.9 billion in 1968-69 and represented 75 percent of all current funds expenditures. They included nine functions.

1. Expenditures of current funds for instruction and departmental research rose 16 percent from the preceding year to nearly $6.0 billion and accounted for 43 percent of all educational and general expenditures.

2. Expenditures for organized activities related to educational departments were $536 million in 1968-69.

3. Sponsored research expenditures (excluding expenditures for Federally Funded Research and Development Centers) totaled $1.8 billion, or 13 percent of educational and general expenditures.

4. Other separately budgeted research expenditures were $252 million in 1968-69. Examples included research bureaus and institutes, and agriculture and engineering experimental stations.

5. Expenditures for other sponsored programs were $679 million.

6. Extension and public service expenditures, excluding major public service programs such as hospitals, were $473 million in 1968-69.

7. Current funds expended by college and university libraries in 1968-69 increased to $574 million, a 16-percent rise over the $496 million expended in the previous fiscal year.

8. The expense of physical plant maintenance and operation was 19 percent higher than in 1967-68, reaching $1.3 billion in 1968-69.

9. Other educational and general expenditures, including general administration expenses, in 1968-69 amounted to $2.3 billion, or 15 percent more than the sum of those categories in 1967-68.

Student aid grants expenditures increased 15 percent, from $719 million in 1967-68 to $823 million in 1968-69. These expenditures exceeded revenues for this purpose by $244 million. In 1967-68, expenditures exceeded revenues by $215 million. The excess funds expended came from other sources of revenues, such as tuition and fees.

Expenditures for major public service programs totaled $1.3 billion, or 7 percent of all current funds expenditures in 1968-69. These were the three categories of major public service programs.

1. Federally Funded Research and Development Centers administered by colleges and universities. Current funds expenditures for these centers were $697 million, or 54 percent of those for all major public service programs. Expenditures were $11 million less than current funds revenues.

2. Hospitals. Expenditures were $527 million, or 41 percent of all service programs.

3. Other public service programs. Expenditures of $68 million in 1968-69 were $8 million less than revenues.

Auxiliary enterprises expenditures increased 10 percent to $2.5 billion, or 14 percent of all current funds expenditures in 1968-69. These expenditures included the following:

1. Housing expenditures increased 12 percent to $673 million.

2. Food services expenditures for 1968-69 were $848 million, a 9-percent increase over the $779 million spent in 1967-68.

3. Other auxiliary enterprises expenditures, such as college unions, bookstores, and intercollegiate athletics, increased 10 percent to $1.0 billion.

Current funds expended for physical plant assets totaled $575 million, equaling 3 percent of all current funds expenditures. It is not identifiable as a subtotal in the total current funds expenditures but is an aggregation from a number of accounts that were already included in the total.

As would be expected, the three regions with the greatest expenditures of current funds were the same three regions that had the greatest current funds revenues: (1) Mideast, (2) Great Lakes, and (3) Southeast. Similarly, the same five States receiving the most current funds also expended the most: (1) California, (2) New York, (3) Illinois, (4) Pennsylvania, and (5) Massachusetts. All States reported increased expenditures for 1968-69, with Delaware's 26 percent the highest percentage increase and Nevada's 1 percent the smallest. (See table B.)

Expenditures by universities, other 4-year, and 2-year institutions were consistent with their revenues. Universities spent $10.8 billion, or 58 percent of all current funds expenditures. Other 4-year institutions expended $6.1 billion, or 33 percent, and 2-year institutions expended $1.6 billion, or 9 percent. Of the $10.8 billion expended by universities, $7.2 billion, or 67 percent, was spent by publicly controlled universities. Of the $6.1 billion expenditures by other 4-year institutions, privately controlled institutions spent the greater portion--$3.2 billion, or 53 percent. Publicly controlled 2-year institutions spent 86 percent of all 2-year institutions' expenditures.

Expenditures Per Student

Expenditures per student (EPS) were computed to indicate the approximate cost of educating one student for 1 year. These EPS averages were derived by dividing current funds expenditures data by enrollment data.[2/] This was done for two fiscal years, 1967-68 and 1968-69; and the dollar increase in EPS was noted. (See table C.)

The average EPS for all institutions in 1968-69 was $2,454. In 1967-68, it was $2,379. The average EPS for privately controlled institutions was $1,256 higher than for publicly controlled institutions in 1968-69--or $3,361 and $2,105, respectively. Institutions with the highest EPS were private universities ($5,124)[3/]; next highest, public universities ($3,450); and lowest, public 2-year institutions ($839).

2/ Opening Fall Enrollment in Higher Education: Part A--Summary Data, 1968 (OE-54003-68, Part A), U. S. Department of Health, Education, and Welfare, Office of Education, Washington, D. C.: U. S. Government Printing Office, February 1969, p. 6.

3/ United States Service Schools had the highest EPS ($10,401) but were averaged in with publicly controlled other 4-year institutions.

Privately controlled institutions had the greatest increases in EPS, because of increased current funds expenditures in conjunction with an actual decline in enrollment. Although, in fact, current funds expenditures by publicly controlled institutions increased more, in percentage and actual amounts, than those of private institutions, the public EPS averages still showed smaller dollar increases because enrollment in public institutions increased 13 percent, almost matching the 14-percent increase in expenditures. The 1968-69 average EPS for public institutions represented a $22, or 1-percent, increase over the $2,083 EPS in 1967-68. The increase in EPS for publicly controlled institutions was less than the nearly 5-percent increase in the cost of living for the two fiscal years.

Data in this report are rounded to the nearest thousand. Therefore, zero in the tables indicates that the amount reported is less than $500.

In addition, some institutions requested that certain data be kept confidential. To avoid disclosure of these restricted data through deduction, others also had to be suppressed in the tables. Blank cells indicate that data have been suppressed to maintain confidentiality. The suppressed amounts, however, are included in the totals shown.

METHODOLOGY

The survey form "Financial Statistics of Institutions of Higher Education," OE-2300-4, was sent out as part of the Higher Education General Information Survey package for 1969. The total population of inquiry was 2,530 institutions. A copy of the survey form is shown in appendix E.

Completed questionnaires were received from 2,312 institutions--a response rate of 91 percent. The population of inquiry and the numbers of respondents by level of institution, region, and State are shown in appendixes B and C, respectively. The institutions that failed to respond or to provide adequate data are listed in appendix D.

One of two methods was used to adjust for nonresponse, depending on whether an institution's data were available for a prior or succeeding year. If an institution had reported data for another year, those data were adjusted in accordance with trends established in previous HEGIS surveys and then entered as the institution's report for fiscal year 1968-69.

If no other year's data were available for an institution, peer institution data for fiscal year 1968-69 were used. Peer institutions were selected on the basis of three criteria: location (State or region), level of instruction, and enrollment size.

INSTRUCTIONS AND DEFINITIONS

GENERAL

1. Data requested on this financial survey are for the fiscal year of your institution.

2. Data for your institution which are not kept on the books of account of your institution, but are kept on the records of another organization or agency for your institution, should be included *(e.g., State schools should report physical plant even though records are maintained by a State agency).*

3. Estimated value of "contributed services" *(members of a religious order only)* should be included under revenues *(private gifts)* and expenditures in appropriate categories.

4. In reporting Federal funds received, include those Federal funds channeled through State agencies.

5. Exclude agency funds; i.e., funds handled by the institution in a custodial capacity only *(e.g., funds for student organizations).*

6. Detailed instructions and definitions are provided for each part. If further explanation is necessary, consult the **College and University Business Administration, Revised Edition.**

7. All data reported should be whole dollars only--omit cents.

8. If the data requested are to be restricted, i.e., not published with the institution's name, then indicate this restriction by placing the numeral one *(1)* in Item 2--Restriction Code. If data are NOT to be restricted, enter the numeral two *(2).*

NOTE: This year's survey is in two "parts," not "schedules." Whereas last year's schedules were numbered I, IV, and V, this year's parts are lettered A and B. However, the content and format of this form and last year's form are basically similar.

SPECIFIC

PART A - CURRENT FUNDS REVENUES BY SOURCE

NOTE: Items in Part A (and in Part B) will be referred to by their line numbers.

LINE 1. This line is the sum of Lines 2, 3, 7, 8, 9, 14, 15, 20, 23, 24, and 25.

LINE 2 Report all tuition and fees assessed against students for educational and general purposes. Tuition and fee remissions *(not intended to be collected)* should be included here and also a corresponding amount under student aid grants for expenditures *(Part B).*

LINE 3. Governmental appropriations include all amounts received from governmental sources that are expendable for educational and general purposes. This item is the sum of Lines 4 through 6.

LINE 7. Report income from investments of restricted and unrestricted endowment, term endowment, quasi-endowment funds, Federal and State land-grant funds *(land-grant institutions),* and income from funds held in irrevocable trusts by others.

LINE 8. Report educational and general revenues given to the institution by any nongovernmental source. Include estimated value of services contributed by members of religious orders *(a corresponding amount should be reported under expenditures).* Include bequests. Do not include funds received for specific research or other sponsored programs in accordance with grants, contracts, or other written agreements.

LINE 9. Sponsored research includes revenues from outside organizations for specific research projects made in accordance with written agreements. Do not include recovery of indirect costs here. Do not include FFR & DC.

LINE 14. Report gross revenues for separately organized research divisions that are not financed in the manner described for sponsored research *(Line 9).*

LINE 15. Include for sponsored programs all separately budgeted programs, other than research, which are supported by sponsors outside the institution. Examples are training programs, workshops, training and instructional institutes such as counseling institutes, college work-study programs, and similar activities for which payments are made in accordance with contracts, grants, or other written agreements. *(Lines 16 through 19)*

LINE 19. Nongovernmental should include revenues from foundations and other nongovernmental sources.

LINE 20. Include recovery of indirect costs accruing from sponsored research and other sponsored programs *(Lines 21 and 22).*

LINE 23. Incidental revenues of educational departments are included here.

LINE 24. This category should contain revenues of activities organized and operated in connection with instructional departments, and conducted primarily to provide instructional or laboratory training of students. Include, also, revenues for activities of a cultural nature, e.g., concerts, dramatic productions.

LINE 25. This item is for revenues for educational and general purposes not covered elsewhere. Important items and those of major magnitude which are reported here should be explained in a separate note, or attachment, accompanying this survey.

LINE 26. Student aid grants--do not include loans or work assignments. Report only grants, scholarships, and fellowships to students for which no services or repayments are required of the student. This item is equal to the sum of Lines 27 through 32, inclusive.

LINE 33. Major public service programs--revenues of major programs undertaken primarily as community or public services, not essential in meeting the educational objectives of the institution, should be reported here. The figure reported here should be the sum of Lines 34, 35, and 36.

LINE 34. Report revenues only for those organizations which are designated as "Federally Funded Research and Development Centers" by the sponsoring Federal agency. Include total revenues for both "in-house" activity and sub-contracts and for both direct and indirect costs.

LINE 35. Report revenues from hospitals here. Include patient fees and State appropriations for operating purposes.

LINE 36. Report other major public service programs. If of major magnitude or importance, attach an explanatory note to the completed form.

LINE 37. Auxiliary enterprises represent the sum of Lines 38, 39, and 40. Report gross revenues of activities which furnish a service to students, faculty, or staff, and which charge a fee to cover the cost *(or a portion thereof)* of the service.

LINE 40. Examples of other auxiliary enterprises would be college unions, revenues from intercollegiate athletics, etc. If of major magnitude, attach to this form a note explaining which items are included in this item.

LINE 41. This line should include ALL current funds revenues. It is the sum of Lines 1, 26, 33, and 37.
